

VANILLA EXTRACT

- Our organic vanilla beans come in an 8-ounce bottle with 1 ounce of exceptional quality Grade A vanilla.
- To make your own extract, add vodka or the spirit of your choice to cover the beans, replace the cap, and shake.
- For extra depth in flavor, you can split the beans down the center with a knife or scissors, making sure to add back into the bottle any caviar on the blade, before you add the spirits.
- Store extract in a cool, dark place and shake at least once a week.
- Vanilla should be ready to use within four months, but the best flavor comes from waiting up to a year.
